## CRYSTAL REPORTS

### INDUSTRY-LEADING REPORTING

This is the OE Reprint Posted Invoice report

#### Drill Down

Not everyone who reads your reports needs the same level of detail. With Crystal Reports you have the capability to hide and show details based on your target audience. The process is simple: double click on a "hot" name or number and the appropriate information will appear for that individual.

#### Will Host Any OLE Server

Crystal Reports will support any OLE Server type applications, such as Microsoft Word or Excel. Create sales reports and then embed Word documents along with marketing plans, Excel spreadsheets and projections for the following year.

#### Produce Presentation-Quality Reports

Add graphs illustrating key data to make your reports more informative and professional. The integrated capability of Crystal Reports gives you over 80 customizable styles to choose from. Graphing can be done on group subtotals, as well as details and formula fields.

Create maximum impact by including a wide range of fonts, images, boxes, lines, and even embedded objects from other applications. Place objects exactly where you want them-no guesswork required. If you're designing a report to be produced on pre-printed forms, you can position objects including scanned images, with graphical freedom.

#### Perform Powerful Data Analysis

Analyze your data with capabilities such as multi-pass reporting and unlimited sorting, including sorting on groups and custom sorting. The powerful formula language contains over 160 functions and operations to assist you.

#### Flexible Distribution

Crystal Reports understands the person writing the report generally is not the person viewing the report. Because of this, users have their choice of how to distribute this information. Not only can you create the traditional printed report, but you can also distribute reports in the following formats:

- Excel spreadsheets
- Word documents
- Adobe Acrobat files
- RPT files
- Run-time executables (.EXE)
- MAPI to Microsoft Exchange
- cc:Mail or other e-mail systems
- ODBC Export to any ODBC compliant application
- Word Perfect or Lotus 1-2-3
- Numerous other formats...
